There is little question that many American communities in Illinois feel they are living under a reign of terror. But what can be done about urban crime? What can be done about the urban crowding that is driving many families out of the city? What can be done about the city’s growing social problems? These are the questions that are being asked by city officials and residents across Illinois.

Fire

Continued from Page 1

The fire was started by a residence in the 1100 block of Tennessee Avenue. The cause of the fire was undetermined. The fire was contained to the residence. No injuries were reported.

Elvis Presley and the Rolling Stones are among the musical stars who will be featured in a new tour of the city. The tour will feature music, dance, and a variety of special effects.

Dave Alpert, a music critic, said that the tour is a reflection of the city's growing culture. "The tour is a way to show the world what the city has to offer," he said.

The trend toward geographic automation actually traces back to the 1990s when new technology was first introduced to the market. Today, many companies are using地理信息系统 (GIS) to help them better understand the patterns of their customers. GIS technology allows companies to store customer data in a database and then use the data to make decisions about where to locate new stores or sales offices.

Another benefit of GIS technology is that it allows companies to track customer behavior over time. By analyzing customer data, companies can identify trends and make predictions about future sales.

One of the main challenges with GIS technology is that it can be expensive to implement and maintain. As a result, many companies have chosen to use simpler tools, such as maps or spreadsheets, to track customer data.

In addition to the costs of implementation, GIS technology also faces challenges in terms of data accuracy. If the data is not accurate, then the results of the analysis will also be inaccurate.

GoodEnergy has signled up about 130,000 households in the St. Louis area to participate in a voluntary municipal power program. The program is designed to help households reduce their energy consumption and switch to clean energy sources.

The transformation of the house by candlelight is a special event for the first time since comple- tion of a two-year restoration project. The instrument was donated to Stephenson House by Gary Ragan, in memory of his wife, Bobbi.

Raport, a dirty, mean man, "the polar opposite of Father Christmas," carries chunks of coal and a switch. His aim is to scare naughty children straight. He threatens to tear the kids apart and exchange them for coal. But parents need not fear exposing their children to "Raport. "He isn't more like a monster than a saint," she said.

Visitors will see candle makers at work in the kitchen and meet Santas portraying Benjamin Franklin and his friend, Nicholas Hays, one of Illinois' first U.S. senators and his third-grade teacher, "A Visit from St. Nicholas," also called "The Night Before Christmas," the famous poem written by Clement Clarke Moore in 1823 that shaped the conception of Santa Claus.

Tickets will be refunded.

Theisng tries to find ways to make cities better

Theisng believes that cities need to focus on building stronger economies and creating more jobs. He says that cities need to work together to create a better future for everyone.

"It's our one big project," said Grable. "It's our one big project, and we're not going to leave East St. Louis on the ground. We're going to build a better city for everyone."
