EDISON

Continued from page 1

Edison's began moving into a development in the 1930s, when Bessie, the developer, had a vision for what the town would be like. She planned a community that would have a large hospital, a school, and a large community center.

The community was planned to be self-sufficient, with a large community center that housed a school, a hospital, and a library. The town was designed to be a model of sustainable development, with a focus on agriculture and community outreach.

The town was named after Thomas Edison, the famous inventor, as a tribute to his contributions to the world of technology. The town was designed to be a model of sustainable development, with a focus on agriculture and community outreach.

The town was designed to be a model of sustainable development, with a focus on agriculture and community outreach.
