Dr. Robert Paulet studying some archival documentation.

Creek Indians, inhabitants of modern day Westerns Georgia and Central Alabama. What this is all about is how these two groups created this connection between each other, between two cultures and how that requires certain adaptations.”

He said that his book demonstrates that the British had to accommodate their armies to this situation where they had to depend upon Native Americans for survival.

That thing surprised him the most while researching his book, he said, was that the British who were trading with Indian villages were actually living in houses built by Indians. “They weren’t building British houses,” he said. “In that they were living on Indian terms. As most historians, he specializes in a particular period of time.

In the colonial period, the 18th century, there was a much greater degree of contact between people who lived in the U.S. compared to later. The British traders from Georgia and the

“I think that the thing that surprised me most is how in the big maps of the 18th century they relied upon traders’ reports and ideals,” Paulet said. “You can see the elements of that human interaction, in the way they were constructed, in the way that was drawn, that was the moment of truth.”

The fact that he grew up in Virginia played both gratifying and disturbing. Gratifying, because it made him think that the British had to get used to traveling in the way they were constructed, in the way that was drawn, that was the moment of truth.”

The five to be done by contractors are: the 100 and 200 blocks of Sherman, the 100 block of Madison, the 400 block of Columbia, the 600 block of Washington and the 800 block of Madison.

“Personally, and I’ll state this every year at the beginning of this, I don’t think I’ll live long enough that I should determine what some of our problems are,” said the mayor.

The work required for the streets on this list ranges from milling and overlay micro-surfacing to total reconstruction. The list is currently made up of approximately 32 streets – work has already been completed on five of those streets and some of the sidewalks have been improved with some established edges and sidewalks,” Hart said.
