Coal company suing its Illinois rival

Highland gears up for Art in the Park

The Highland Arts Council is hosting its eleventh annual Art in the Park. The two-day event features 40 local and regional artists and will be held in Lindendale Park in Highland, Illinois, 35 south of the I-80/94 Tollway.

The Highland Arts Council’s outdoor festival, featuring works of all categories, is happening from 11 a.m. to 6 p.m. Friday and Saturday, Oct. 11 and 12.

In addition to art vendors, there will be a live auction on the main stage, as well as performances by many local groups.

The festival will feature a variety of musical acts, including local groups such as the Highland Community Band and the Highland High School Band.

In addition to music, there will be a variety of food vendors, including local restaurants and food trucks.

ST. LOUIS (AP) — A leading environmental group has filed suit to challenge a new federal regulation that could significantly limit certain types of pollution from power plants, though a representative of the group said it would likely not significantly impact the health of the state’s air.

The lawsuit was filed in St. Louis County Circuit Court by the Natural Resources Defense Council (NRDC) on behalf of the Clean Air Council, a group that promotes clean energy solutions.

The lawsuit argues that the rule would force power plants to make significant reductions in air emissions, which could have a positive impact on the environment.

The lawsuit does not seek to block the rule, but rather to force the agency to provide more information about the rule’s impact on the environment.
