Lawrence also reported erosion had caused a water main at Windsor Point behind Sommerfield Subdivision to be in danger of collapsing.

“The water main was exposed during the recent storms and spouts and we were concerned the water line would fail,” he said.

The second repair was off Route 157 behind the Comfort Inn.

Lawrence said heavy rain had exposed a sewer main and repairs were needed to prevent future erosion.

“It was in pretty remote area and our guys had a hard time finding it, he said,” he said.

The repairs near the Comfort Inn cost $10,800 and the repairs to the Windsor Point sewer line cost $15,000.
